Dear Colin

MUSEUM COMMITTEE – ANNUAL REPORT 1987-88

The question of renegotiation of the Institution's loan agreement with the Royal Museum of Scotland at their request has not been fully resolved but an effort will be made to progress matters during the coming session.

Recent donations have included the Talla Water Supply transit instrument by Elliott Bros, a brass measuring device by G Hutchison of Edinburgh and a Tern sub-tense bar in leather and canvas case.

The Tall transit instrument donated by Lothian Region Water and Drainage Department attracted national publicity through NCE and resulted in a feature article on how it was used by Brian Dumbleton (NCE 7 April).

Other activities during the year have included advising and assisting the Clerk Maxwell Trust to establish an international museum in Edinburgh.

Yours sincerely

R A Paxton
Chairman
