CREATION OF THE BELL ROCK LIGHTHOUSE 1807-11 – ONE OF 'THE SEVEN WONDERS OF THE INDUSTRIAL WORLD'

by Professor Roland Paxton MBE FICE FRSE School of the Built Environment, Heriot-Watt University

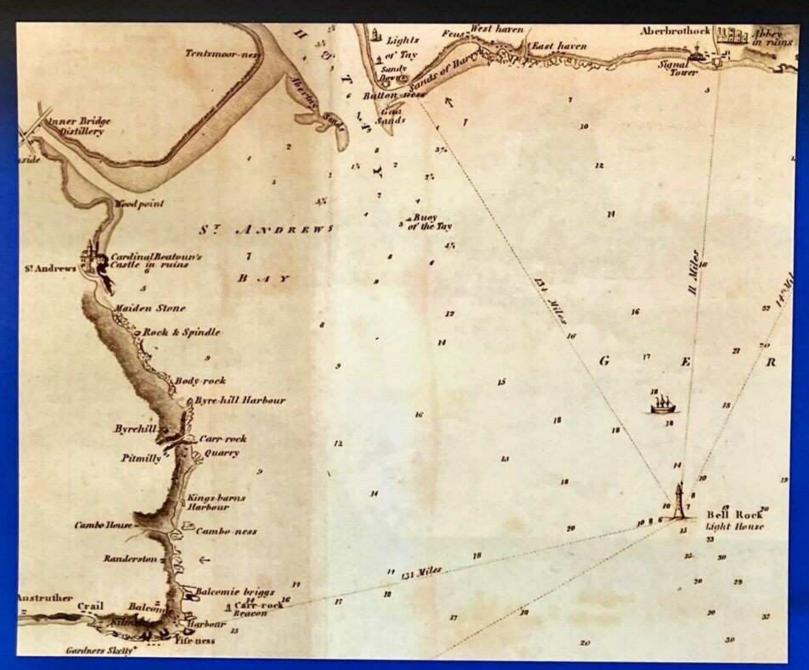

SCOTLAND'S DANGEROUS UNLIT COAST

(Isle of May Lighthouse 1635) Northern Lighthouse Board [NLB] formed in 1786 to improve maritime safety

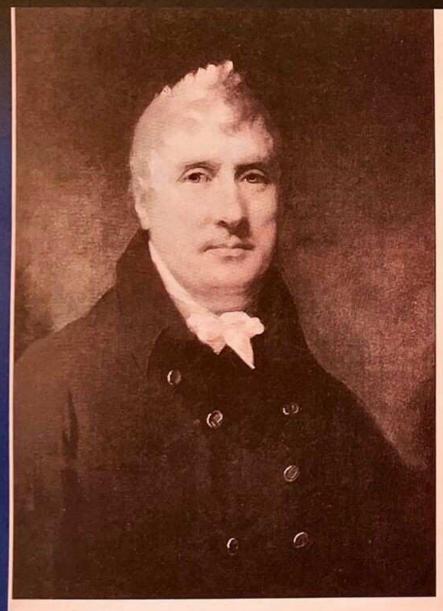

Isle of May coal-fired lighthouse – in service 1635 -1816

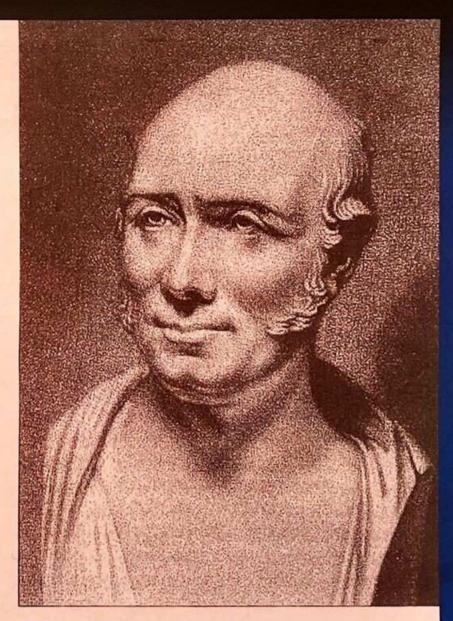

The hazardous Inchcape or Bell Rock 11 miles off Arbroath

The Bell Rock at low tide – submerged up to 4m at high tide. In 1799 70 vessels were stranded or lost on Scotland's coast, many of which would have found a safe haven in the Firth of Forth had there been a lighthouse on Bell Rock - The challenge of creating one by 1811 was met by Rennie & Stevenson based on Smeaton's Eddystone lighthouse of 1759

John Rennie FRS, FRSE

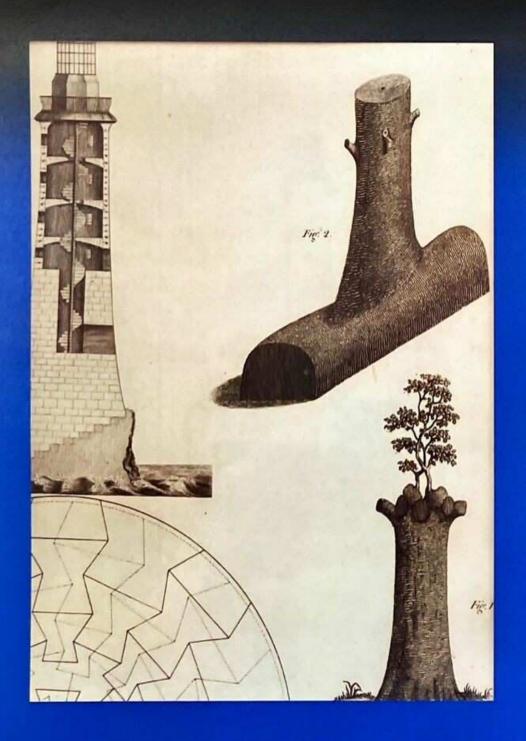

Robert Stevenson FRSE

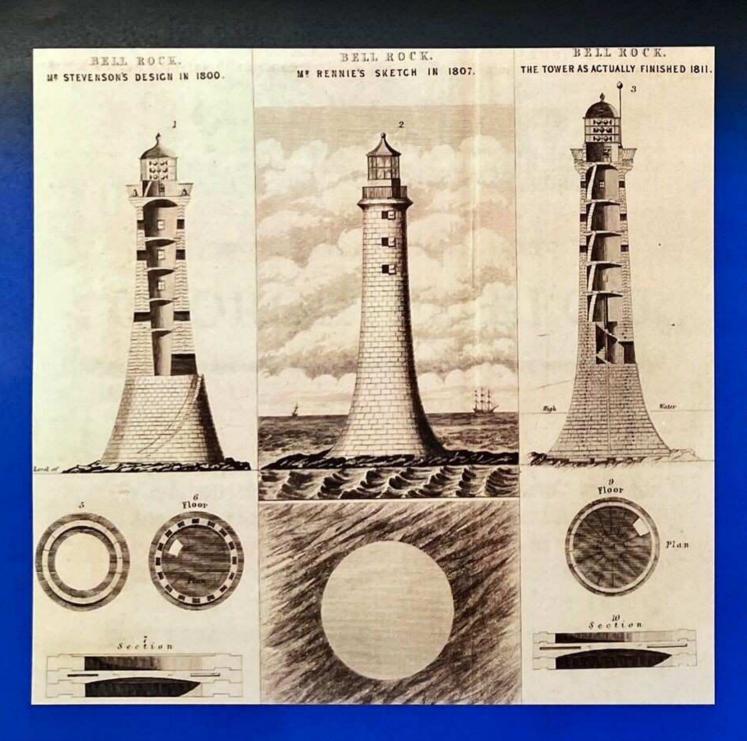

Civil Engineers Rennie (1761-1821) & Stevenson (1772-1850)

Eddystone lighthouse 1757-59 (nr. Plymouth) in a storm in 1759

Smeaton considered his design structurally analagous to an oak tree. He regarded dovetailed masonry as essential.

Bell Rock lighthouse designs 1800-11. Note that in Rennie's and the as built design, the tower curvature at the rock is about 40° to the horizontal to dissipate wave force. As seen, Stevenson proposed about 70° and omitted dovetailing
