*Above: Tarbat Ness
Lighthouse designed and
built by Robert Stevenson.
Established 1830.*

*Left: Lantern showing the
emergency back up light.*

*Opposite page: The view
from the top of the tower.
Tarbat Ness is the third
tallest lighthouse in
Scotland (North Ronaldsay
and Skerryvore being
taller) and bears two
distinguishing broad red
bands.*

DAVID A. STEVENSON
FAIR ISLE SOUTH & NORTH LIGHTHOUSES

All images reproduced with the kind permission of Ian Cowe © www.flickr.com/iancowe

Above: Fair Isle South (Skaddan) Lighthouse was designed and built by David A. Stevenson. Established 1892. Fair Isle South was automated in 1998 and was Scotland's last manned lighthouse.

Below: Fair Isle North (Skroo) built by David A. Stevenson. Established 1892. The solar panels were added in 2006.

DAVID A. STEVENSON
FLANNAN ISLES LIGHTHOUSE

All images reproduced with the kind permission of Ian Cowe © www.flickr.com/iancowe

Flannan Isles Lighthouse designed and built by David A. Stevenson. Established 1899. Most notable for the disappearance of the three keepers in December 1900.

Above: The former Shore-Station for the Flannan Isles at Breasclete.

Below: The fine detail from above the door at the Shore Station. Inscription: IN SALUTEM OMNIUM 1899

ROBERT STEVENSON
ISLE OF MAY LIGHTHOUSE

All images reproduced with the kind permission of Ian Cowe © www.flickr.com/iancowe

Isle of May Lighthouse designed and built by Robert Stevenson. Established 1816. The Isle of May was the site of the earliest coal-fired light in Scotland dating back to 1636. The original tower, though modified, is still in existence.

Internal view of the Isle of May stairwell painted to give the effect of dressed ashlar stone.

DAVID AND THOMAS STEVENSON SCURDIE NESS LIGHTHOUSE

All images reproduced with the kind permission of Ian Cowe © www.flickr.com/iancowe

Above: Scurdie Ness Lighthouse was designed and built by David and Thomas Stevenson. Established 1870.

Right: The internal brick tube from which the original clockwork weight would rise and fall, now used to channel the cables connected to the automation of the station.

ALAN STEVENSON
ARDNAMURCHAN LIGHTHOUSE

Above: Ardnamurchan Lighthouse was designed and built by Alan Stevenson. Established 1849. The light stands on the most westerly point on the Scottish mainland.

Left: Egyptian influences can be seen in the ornate corbel beneath the balcony and doorway.

ALAN STEVENSON
SKERRYVORE LIGHTHOUSE

All images reproduced with the kind permission of Ian Cowe © www.flickr.com/iancowe

Skerryvore Lighthouse was designed and built by Alan Stevenson. Established 1844. It stands 48 metres high and is built of pink Ross of Mull granite, apart from the four lower courses of gneiss rock from Tiree.

Above: Skerryvore Lighthouse – base of tower (see page 12)

Below: Hynish was chosen as the location for a shore station and harbour as it was the closest location to Skerryvore, the harbour regularly silted up and Alan Stevenson had to design a fresh water flushing system connected to a reservoir to remove the silt.

ROBERT STEVENSON CORSEWALL LIGHTHOUSE

All images reproduced with the kind permission of the Northern Lighthouse Board: Photographs by Arnaud Späni ©.

Above: Corsewall Lighthouse designed and built by Robert Stevenson. Established 1817.

Below left: Corsewall is one of the few Stevenson lights to have an open spiral staircase.

Below right: Following the automation of the station in 1994 the former keepers' cottages were sold and converted into the Corsewall Lighthouse Hotel.
